

Editorial Index

AIR CARGO WORLD

Volume 78-1988

Numbers 1-12

Editor's Note: This year's editorial index covers material from the January 1988 through December 1988 issues of *Air Cargo World*. The index lists all feature stories and major department articles included in each of the year's issues.

For easy reference, feature articles are indexed four ways: by exact title as published, under an article-subject heading, under an author-subject heading, and by a cross-reference by subject. All entries are followed by the month of issue and page number.

Five of the magazine's monthly departments have been listed under separate headings. Departments include: Editorial Note, Literature, Machinery and Equipment, News Update and Washington Wire. Also indexed are the monthly columns on Aircraft, Automation, Global Trade and Trucking, listed under those respective categories.

Other category headings have been broken down by listing major segments of the air cargo industry. Industry headings include: Air Shows, Aircraft, Airlines, Air Industrial Parks, Airports, Carriers, Computers, Customs, Forwarders, International Trade, Organizations, Regulatory Actions and Security.

A

Air Cargo Markets: Heavier Freight Muscles In — Bruce Johnson	Aug 22
